

Product Portfolio 2018

INNOVATION IN PROTECTION.

Made in the UK.

RMX work across a number of sectors, creating surface coatings and innovative cleaning products.

A range of bespoke products have been produced which not only provide highly advanced, long-term protection but improved operational efficiencies for companies and revenue

opportunities for distributors.

Presently the commercial range consists of exterior and interior multiple surface, invisible protection coatings and revolutionary waterless cleaning products. We are also constantly working on new products based on requests from our clients.

TRENCHARD

AVIATION

Delivery, Quality, Service

WORKING TOGETHER.

The best of both worlds.

RMX have formed a joint venture with the Trenchard Aviation group in order to provide full service aircraft cleaning contracts for major airlines. By joining together RMX advanced products with Trenchard's vast ground services skills, we have been able to create a market leading service with global capabilities.

The service specializes in offering contract plans for waterless aircraft cleaning with enhanced performance, reduced scheduled out-of-service time and improved environmental impact.

In addition to aircraft cleaning, services offered include application of the ultra-lightweight RMX CSP aircraft coating to further enhance aircraft appearance and operational efficiencies.

For the future, the service will increase to offer bio-decontamination, pest control, toilet line & tank blockage prevention and aircraft seat stain guards.

Distributors

Automotive Dealers | Auto Valeting Equipment Wholesalers | Commercial and Industrial Suppliers

Aviation Equipment Suppliers | Paint Coatings Specialists

End Users

Retail Customers | Vehicle Fleet Operators | Airlines | Airline MRO's | Commercial Builders

CSP

A water-based, non-hazardous spray consisting of a blend of reactive polymers used to impart a protective invisible coating to surfaces

CSP

“Maintain the look”

Paint Protection

Featuring the highest level of ultra violet light blocking to prevent fading of corporate colours and logos due to U.V. degradation.

CSP ensures vibrant, longer lasting colours between repaints and long term protection to the paint surface.

CSP allows the surface to retain its appearance by repelling liquids and therefore reducing dirt and grime build up.

CSP

“Extend the cleaning cycle”

Reduced Downtime

Dirt, grime and other foreign bodies find it difficult to bond to the surface meaning slower build-up and easier/faster removal.

Cleaning cycles can be lengthened without any

adverse short term or long term cosmetic effects.

The potential for significant reduction in cleaning events means the initial investment is recouped within the first year of operation.

CSP

“Quick and easy to apply”

Low Maintenance

Applied using trigger spray or standard HVLP equipment immediately after cleaning.

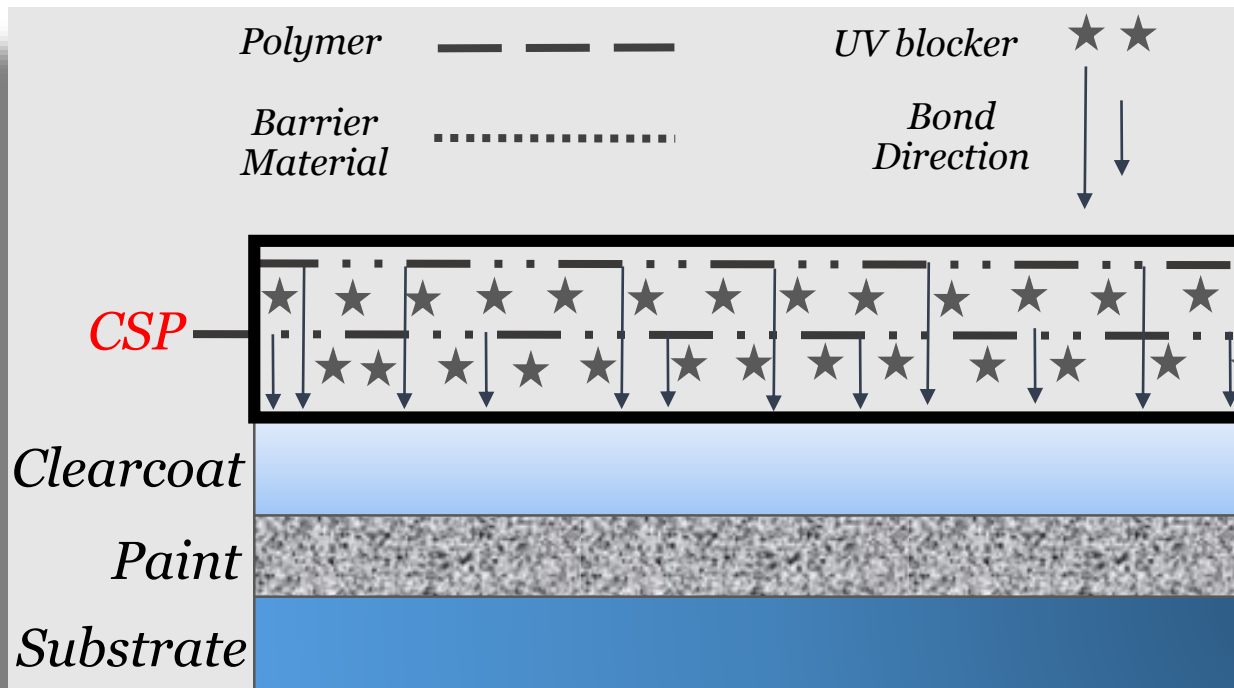

Requires no PPE usage or specialist application equipment.

Single application only required. Cures within 5 minutes.

Requires no further aftercare.

Contains no hazardous chemicals, solvents or caustics.

Not removed by glycols. Unaffected by use of de-icing chemicals.

CSP

“The Technology”

Polymer Engineering

CSP works by using highly advanced polymer engineering to create a microscopic surface which is able to form a permanent bond with the substrate.

The surface created has a range of materials which each provide a different layer of protection within the coating.

CSP is invisible, the only

noticeable change to the surface will be that it feels smoother to the touch since the polymer layer fills microscopic crevices to create a perfectly smooth surface.

CSP

“Comprehensive testing”

Tested and Approved

Boeing: D6-17487 Revision R

Airbus: AIMS09-00-002 (Issue 3, July 2011)

CSP

“Long-lasting protection”

Product Lifespan

The exact lifespan of RMX Complete Surface Protection will depend on the environment it operates in.

During a recent group test in New Zealand, paint manufacturer

Dulux completed a harsh environment accelerated testing programme and found that the CSP product was the only product tested to maintain its' effectiveness after a 5 year equivalence.

Professionaly Tested

Independently tested by Dulux laboratories for the effects of moisture and U.V. over time and completely beat the competition, giving an equivalent of at least **5 years protection.**

DRYWASH

Distributors

Supermarkets | Auto Valeting Equipment Wholesalers | Automotive Accessory Retailers

Aviation Equipment Suppliers | Commercial and Industrial Suppliers

End Users

Retail Customers | Vehicle Fleet Operators | Airlines | Aircraft Cleaning Companies | Yacht Owners

DRYWASH

A waterless, environmentally friendly exterior cleaner which removes dirt and grime and leaves a polished finish

DRYWASH

Clean in the Hangar

“Reduced aircraft downtime”

Advanced Drywash does not require the use of water, cleaning chemicals or waxes. It creates no fallout to the ground. It does not require the use of

aircraft wash bays thus meaning the aircraft can be cleaned by hand in the maintenance hangar whilst maintenance is taking place, therefore

removing the cleaning downtime allowance from the rota. Operator savings from the reduced downtime are sizeable and easily measured.

DRYWASH

“Saving the planet”

Environmental Advantages

Advanced Drywash can give airlines, vehicle fleet and aircraft cleaning companies huge water savings and creates no chemical waste.

It uses highly advanced reactive polymer technology and does not include or require the use of silicones, caustics or solvents.

Advanced Drywash can be shipped, stored and used without the need for any specialist considerations and does not require applicators to wear personal protective equipment.

Advanced Drywash contains no hazardous materials.

DRYWASH

“Off the shelf”

Retail Opportunity

As well as being used in commercial applications, Advanced Drywash can also be sold through retail channels under the “Secret Agent” branding which is fully owned and trademarked by RMX. The product can be sold in a number of different

trigger spray being the best-seller.

Since Advanced Drywash does not contain any hazardous materials, it can be used not only on vehicles, motorbikes, bicycles and caravans but also around the home and garden.

METALGUARD

Distributors

Automotive Dealers | Auto Valeting Equipment Wholesalers | Commercial and Industrial Suppliers

Agricultural Equipment Suppliers | Paint Coatings Specialists

End Users

Facilities Management Companies | Vehicle Fleet Operators | Farmers

Large Industrial Operators | Commercial Builders

METALGUARD

***A virtually invisible,
removable acrylic-polymer
coating which resists corrosion
from acids and chlorides for
bare metal and painted metal
surfaces***

METALGUARD

“Quick and easy”

Easy to Apply

Application is quick and easy either by spraying or painting a thin virtually invisible coating directly on to the surface.

It cures at ambient temperature and is touch dry and fully effective within minutes.

Apppliers do not require any specialist PPE.

MetalGuard is able to form a permanent bond with either bare metal or painted metal surfaces. Used during manufacture or applied in situ MetalGuard is fully removable if required.

As well as commercial metalwork and pipework, the product presently finds use protecting the underneath of brand new motor vehicles during shipping and transport as well as being used to protect agricultural machinery during winter.

METALGUARD

“Long-lasting”

Highly Resilient

Testing has shown MetalGuard can provide protection for a long period of time. So far the product has shown to protect for three years and is still going.

Even in a harsh, corrosive environment

it will provide a minimum of 12 months protection.

MetalGuard's low cost and ease of application means it is perfect to be used where sporadic re-application is required.

METALGUARD

*Accelerated Testing:
Copper plated steel – 1 hour immersion in a corrosive
solution*

Standard 2p
coin

Only imparts a
slight gloss –
virtually invisible

Half of coin
treated

Acid solution

Treated half
remains unaffected

METALGUARD

“Strong and flexible”

Wide Operating Parameters

MetalGuard can withstand surface flexing and friction contact from light abrasive materials without impeding its effectiveness in corrosion protection

It can operate fully and maintain its chemical composition within a temperature range of:

-80 C - +280 C

FABRICGUARD

Distributors

Automotive Dealers | Auto Valeting Equipment Wholesalers | Commercial and Industrial Suppliers

Aviation Equipment Suppliers | Marine Chandlerys

End Users

Vehicle Owners and Fleet Operators | Airlines & MRO's | Public Transport Organisations

Yacht Owners | Upholstery Manufacturers

FABRICGUARD

An invisible protective coating for fabric which protects against staining from spillages. Long-lasting without changing the look or feel of the fabric.

FABRICGUARD

“Quick and easy”

Easy to Apply

Application is quick and easy by spraying a thin virtually invisible coating directly onto the surface.

It dries within 2 hours and fully cures within 24 hours.

Apppliers do not require any specialist PPE.

FabricGuard is able to form a permanent protective bond with all types of fabric including seat upholstery, carpets, curtains and even clothes.

The product is particularly useful commercially for transportation firms operating buses, trains or aircraft as well as privately in the home, in a vehicle or a yacht.

FABRICGUARD

“Long-lasting”

Highly Resilient

Testing has shown FabricGuard can provide protection for a long period of time and is resilient to wearing from constant use such as on seat materials.

FabricGuard will protect against liquid staining

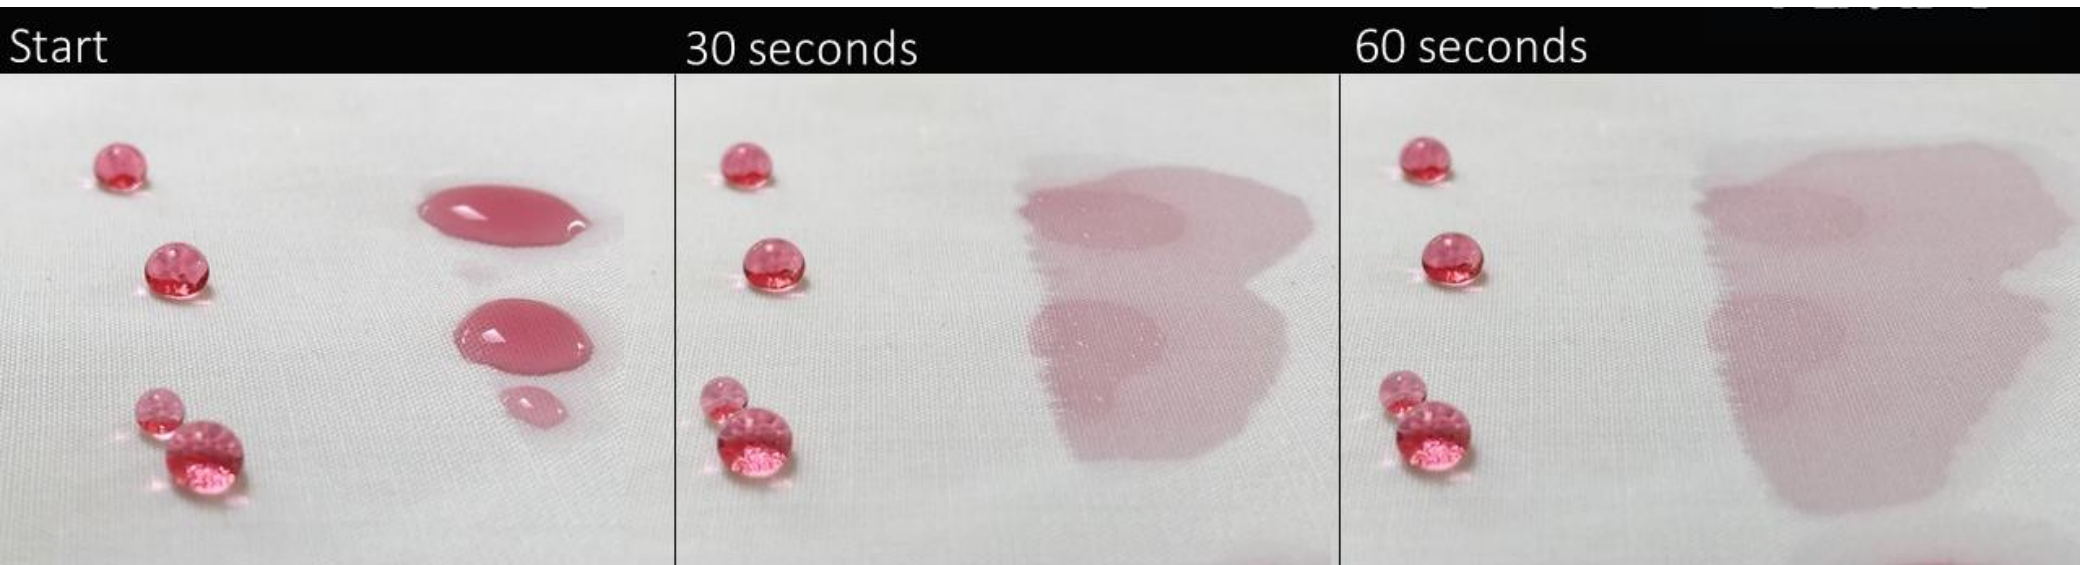

from water and oil based substances.

FabricGuard does not change the look or feel of the fabric it is sprayed onto and forms a completely invisible protective barrier.

FABRICGUARD

“Proven effective”

1 minute time-lapse of RMX FabricGuard
treated cotton versus untreated.

SHOWER STAYCLEAN

Distributors

Supermarkets | Domestic Retailers | Hospitality Equipment Suppliers | Commercial and Industrial Suppliers

End Users

Retail Customers | Hoteliers | Care Homes | Housing units

SHOWER STAYCLEAN

A shower cleaner and protective barrier all in one. Spray on once per month and the surface becomes self-cleaning when wet and virtually removes all future cleaning requirements

SHOWER STAYCLEAN

“The technology”

Clean

The formula contains a natural citric acid to breakdown dirt, limescale, water marks and soap scum and then uses the polymer engineering

to separate particles from the surface ensuring they are easily removed when the surface is wiped with a cloth.

StayClean

The formula creates a hydrophilic modification of the surface which means that when fully wetted, the surface will uniformly dry downwards removing

soap and grime within the process. This will ensure treated shower surfaces will remain cleaner far longer and carry out self-cleaning when the shower is used.

SHOWER STAYCLEAN

“In the shops”

Retail Opportunity

As well as being used commercially in hotels, hospitals and housing units, Shower StayClean

can also be sold through retail channels using the RMX retail brand “Secret Agent”.

Commercial Advantages

- Innovative product attributes
- Time and labour saving
- Two products in one bottle
- Easy to use, easy to explain
- Solves a problem
- Has mass market appeal
- Low cost, high value product
- Built in obsolescence (repeat/regular purchase)

AUTOMOTIVE RANGE

In addition to our core product portfolio, for 2018 a full automotive product range has been created and the products on the following pages along with CSP, Drywash and FabricGuard can be used to create a full car care proposition

Distributors

Supermarkets | Auto Valeting Equipment Wholesalers | Automotive Accessory Retailers

End Users

Retail Customers | Vehicle Fleet Operators | Vehicle Retailers | Vehicle Valeting companies

NEUTRAL DETERGENT

***A specifically
formulated detergent
to prepare the surface
fully for the CSP
coating***

WASH & WAX

A wash and wax which includes a hydrophilic coating so that the majority of the water will disperse or dry without leaving water marks on the vehicle

ALLOY WHEEL CLEANER

A simple spray on wheel cleaner which cleans the wheels within seconds without any need to scrub

A close-up photograph of a hand wearing a white nitrile glove, using a bright yellow sponge to clean the sidewall of a black car tire. The tire is mounted on a silver alloy wheel. The background is blurred, showing parts of the car and some greenery.

TYRE CLEANER

***A non-glossy spray on
tyre cleaner***

INTERIOR CLEANER

A non-toxic spray-on interior cleaner. Clean and polish all areas of the interior of the vehicle

LEATHERGUARD

*An invisible coating
which protects the
leather and maintains
the “newness” without
changing the look or
feel of the leather*

GPS

***A spray on glass
protection sealant
which uses an
advanced hydrophobic
coating to provide
better vision during
rainfall***

CARPET CLEANER

*A carpet cleaning
solution to be added to
your carpet cleaning
machine*
